

Name: Agusin, Princess Aira D.

Year/Grade/Section: 1-BSCS-A

Title: Personal Website Development Plan

The goal of this personal website is to create a digital space that reflects my identity, showcases my skills as a platform to connect with my audience. Drawing on insights from W3schools. Develop a visually appealing homepage introducing myself, including a brief bio and a photo. Use HTML and CSS for structuring and styling. Creating a portfolio section to highlight project, and skills. Develop a detailed "About Me" page to provide insight into personality, interests, and values.

By incorporating the principle learned from W2school, this plan aims to create a personal website that effectively communicates my professional identity, engages visitors, and provide a positive user experience.
